

Financial Solutions for Today's Technology

Edge Solutions

Bridging the Gap with Financing Options

Edge Solutions is an IT solution provider that delivers one-stop shopping for your IT needs, including hardware, software, maintenance and financing solutions. Strategic financing and leasing enables you to fulfill your IT demands today while managing payments over time. We are dedicated to streamlining your business and offering excellent customer service.

Edge Solutions is a premier IT solution provider focused on making your business successful. A key component in delivering a comprehensive solution is structuring a leasing or financing option that works.

How Our Program Works for You

Edge Solutions offers a wide range of leasing and financing options designed to help you get the IT solution you need while minimizing the financial and technological risks that accompany ownership.

Leasing options provide your organization the ability to match cost with benefits by spreading payments over the useful life of the asset. We know customers are faced with changing capacity requirements and need the ability to add or upgrade your capabilities. You want to avoid technological obsolescence. Leasing enables you to avoid large up-front payments, allows more flexibility to accommodate additional needs, and gain predictable, month-to-month expense-facilitating budget reporting and planning.

Benefits of Leasing

- Enables you to acquire a solution right now, even if the budget is not available
- Spreads costs across lifetime of solution
- Helps defeat obsolescence by enabling technology refresh alternatives
- Conserves capital for other projects
- Gives one simple payment plan, tailored to client needs
- Transfers credit risk to lessor
- Increases cash flow
- Can be treated as an expense rather than a depreciation.

Allow one of our Edge Financial Consultants to review your financing options, and support your successful IT implementation.
