

Whatever it takes.

Edge Solutions is a premier IT solution provider focused on making your business successful. A key offering is EdgeTrax, Edge Solutions' asset and contract management solution.

How Our Program Works for You

Time Savings: By creating a single repository of all asset information, your IT team is not bogged down with the information gathering process.

Reduced Cost: Our repository hosts the creation, archival and management of detailed services quotes allowing more efficient contract management.

Accurate, On-time Renewals: Our customers routinely achieve a 100% renewal rate. Automated renewal event notifications make sure every renewal event is acknowledged and executed.

Improved Budget Control: The solution includes versatile reporting capabilities that strengthen forecasting and annual budgeting.

Fewer Errors: Initial audits typically find between 25% and 35% of service contracts are unregistered, expired or inappropriately deployed. Realignment of service agreements produces significant savings to you.

Save Time and Money

Edge Solutions is an IT solution provider that tracks and manages all of your IT assets in a single repository with our EdgeTraxSM service. This enables successful renewals for maintenance contracts as well as overall improved management of technology assets. Edge Solutions is dedicated to streamlining your business and offering excellent customer service.
